

ALI ABDELHADI

Senior Software Developer — Mobile & Full-Stack

Beirut, Lebanon | +961 76 618326 | Aliabdelhadi64@gmail.com

PROFESSIONAL SUMMARY

Senior Software Developer with 4+ years of experience architecting, building, and shipping production-grade mobile and web applications end to end. Deep expertise across Kotlin (Jetpack Compose), Flutter, Ionic, Angular, and the .NET stack, with a track record of multiple apps published on Google Play and the App Store. Skilled at designing scalable architectures (MVVM, clean layering, REST) and reliable data layers on MSSQL and MySQL, while integrating AI capabilities and automation to drive business value. Comfortable owning features from requirements through release, mentoring peers, and collaborating with designers, PMs, and stakeholders.

EXPERIENCE

Nascode — Beirut

Senior Software Developer | Mar 2023 – Present

- Led design, development, and store publishing of the THD, Piscover, and Yerker Android apps using Kotlin and Jetpack Compose, owning the full delivery lifecycle from architecture to release
- Architected and delivered cross-platform Flutter applications (Nascode App, AiPoker, Linkled) sharing a single maintainable codebase across iOS and Android
- Built the CCCL (Children's Cancer Center of Lebanon) donation platform end to end, integrating Areeba, Stripe, and Monty for secure one-time and recurring giving
- Delivered Unipak – The Shop, a full e-commerce platform, engineering scalable catalog, cart, and checkout flows
- Designed and built the YMP voting system for secure, real-time vote management under high-concurrency load, handling up to 2M requests and 30,000 user votes on election day
- Built MedVault, a Flutter healthcare platform connecting patients with trusted clinics and giving them secure access to view, track, and manage their lab test results anytime, anywhere
- Engineered a GS1 barcode system in ASP.NET to generate barcodes, invoices, and certificates, replacing a previously manual process
- Built the Mohamad Elhabib Real Estate platform end to end using ASP.NET (.NET)
- Integrated AI capabilities into production applications and designed workflow automations with n8n to streamline core business processes
- Established clean UI component systems and robust integrations across REST APIs, Room DB, and MVVM architecture, raising consistency and maintainability across projects
- Contributed to Angular frontends, partnering with designers and PMs to plan, prioritize, and ship releases on schedule

Gtonics — Beirut

Software Developer | Feb 2022 – Mar 2023

- Developed and published the Ici Beyrouth, This Is Lebanon (Flutter), and This Is Beirut news apps to production app stores
- Built the CarryOn app with Ionic, integrated against PHP backend services
- Worked extensively with MSSQL and MySQL to design and manage reliable data models
- Built responsive UIs and integrated APIs for seamless, high-performance user experiences

SKILLS

Mobile Development: Kotlin, Jetpack Compose, Android SDK, Flutter (Dart), Ionic

Web Development: Angular, TypeScript, ASP.NET, VB.NET, WordPress, PHP

Architecture & Design: MVVM, Clean Architecture, REST APIs, Scalable System Design

Databases: MSSQL, MySQL, SQL

Payment Integration: Areeba, Stripe, Monty, Recurring & One-Time Payments, PCI-Aware Checkout

AI & Automation: AI Integration, Workflow Automation (n8n)

Tools & Practices: Git, REST APIs, GS1 Barcode Systems, Code Review, Quality Assurance, Agile Development

EDUCATION

Lebanese International University — Beirut | Bachelor's in Computer Science (2021)

CERTIFICATES

- Workshop on Data Analysis with LLM (EFAI 2025) — USJ University
- Full Stack Bootcamp — Udemy
- JavaScript Specialist Certificate — CodeAcademy
- CCNA2 – Cisco Networking and Switching
